Art Unit: 1761

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 16, 2003 has been entered.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3, 5, 6, 10-14, and 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant does not teach "sterilized" with respect to the dairy product. Specifically, page 3, lines 25-29 of the specification refers to the starting material not to the dairy product.

Applicant does not teach "such as to have aromas of the ripening strain formed" or what is encompassed by this phrase.

Claims 1-3 and 5-21 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for *Candida zelanooides*, *Debaryomyces hansenii* spp *hansenii*, *Saccharomyces cerevisiae*, *Candida robusta*, *Zygosaccharomyces rouxii*,

Art Unit: 1761

Micrococcus luteus, *Arthrobacter*, *Corynebacterium*, and *Arthrobacter ssp*, does not reasonably provide enablement for any and all lactose-negative, food-technologically acceptable micro-organism. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.
